Information regarding long distance race

There is access for boat trailers for those competing in the long-distance race for boats to be unloaded and rigged at the marina in Kelvin Heights to save rowing up the lake. Those trailers can then return to the finish area for boats to be derigged at Frankton beach at the end of the race.

Please Note: that there is no mixed 4X or any category of 4+ scheduled for the long-distance race to enable us to manage numbers of crews on Lake Wakatipu in conjunction with our consultation with the Harbour Master in our application to race on the lake.

Further detailed information will be provided at the briefing.

Boats are available to hire for racing – information is available by contacting WRC as below.

Further information can be obtained by contacting WRC at simasters@wakatipurowing.kiwi
